

### Posterior Predictive Check

Model-predicted lines should resemble observed data line

### Homogeneity of Variance

Reference line should be flat and horizontal

### Collinearity

High collinearity (VIF) may inflate parameter uncertainty

### Normality of Random Effects (participantID)

Dots should be plotted along the line

### Linearity

Reference line should be flat and horizontal

### Influential Observations

Points should be inside the contour lines

### Normality of Residuals

Dots should fall along the line
